

Project Roadmap

Objective

- Train and fine-tune WPBot Pro chatbot with domain specific knowledge.
-

1. Tech Stack

- **Programming Language:** Python
 - **Tools:**
 - **Machine Learning:** PyTorch, Scikit-learn
 - **LLM-based translation:** OpenAI's GPT API
-

2. Functional Requirements

- ✓ **Comprehensive Training**
Leveraged the provided materials such as FAQs, company details, and customer interaction data to train the WPBot Pro chatbot effectively.
- ✓ **Conversational Flow Design**
Created a seamless and engaging conversational flow to guide users effortlessly through various scenarios and inquiries.
- ✓ **Response Optimization**
Developed precise, clear, and brand-aligned responses to deliver consistent and professional communication.

✓ **Lead Qualification**

Incorporated strategies within the chatbot to identify potential leads and collect essential customer information.

✓ **Website Integration**

Ensured smooth integration of the chatbot with the website and associated online forms for uninterrupted user experience.

✓ **Testing and Refinement**

Conducted comprehensive testing to validate functionality and refine responses based on user interactions and feedback.

✓ **Continuous Optimization**

Regularly monitored the chatbot's performance and implement improvements to enhance accuracy and efficiency.
